### ***“Make Your Own Website”***

#### **Foreword**

Do you remember the day you decided to create a business online? Can you recall the adrenaline that surged through your body as your mind took over and developed an attitude of believability?

Your mind was racing with ideas on how to put your newfound knowledge to work. Your ears kept hearing that sound in the back of your mind that was almost a mantra. . .ka-ching – ka-ching – ka-ching! If this describes you, raise your hand! Okay, you get the drift.

What happened to all that energy? Where is the optimism? Did you just get frustrated and give up? Or, was it the big, bad, boogey man “confusion?” Or maybe it was his sidekick “frustration?” Or, possibly you became a victim of “Information Overload”.

Maybe you came to realize that you are competing with hundreds of other marketers all fighting for the attention of the same customer as you.

So what’s the secret? The secret is inside **Make Your Own Website – An Ezy-Internet Guide**. Now before you start groaning, “not another do it yourself ecourse” you need to listen up and pay attention!

**Make Your Own Website – An Ezy-Internet Guide** is not just another pretty face. This guide was written by a very experienced online marketer who isn’t afraid to tell it like it is. Jump over to the author page and you’ll see what we mean.

## **About the Author**

John Williams writes: I use my computer to write books, promote my products and services, and keep in touch with friends and colleagues around the World.

I've helped many people learn to use their computers better, including people that felt their age, health problems, lack of money or education meant that they could not successfully use the Internet, let alone set up their own web site.

I learnt to make web pages the traditional way. I like making web pages.

But I wrote this book as a guide for the thousands of people who can see the potential of having their own Internet web site but want to do it quickly, smoothly and, where possible, at low cost.

~~~~~

## **~ YOUR SNEAK PEEK INTO ~**

### **“Make Your Own Website”**

By John Williams

In the Introduction to “**Make Your Own Website**”, John Williams emphasizes that he is resolved to help you to make your own web site in a few short hours, and to make it as easy as possible! Many people believe that there is no way that “ordinary” people can do that without special training or a large budget, that it’s just too hard or too expensive! They don’t want to learn HTML or any other language – they just want to be able to make a simple web site with easy to use tools.

John has helped many people who had little computer knowledge to make their own web sites and put them on to the Internet. In a few hours, they become confident about using their computers and most of them still update their web sites themselves. In return, this book was written to make it even easier to have all the answers by your side as you work through this step by step guide. It answers hundreds of questions, and ***making it simpler*** – cutting out the jargon that they get from everyone else.

Any time that you want more information about some point in the book, you can find more details in the “More Information” section at the end of the book and at the help site for “*Make Your Own Website*”. You will find a growing amount of helpful information there, so ask John your questions and send him your criticisms.

---

**Make Your Own Website – An Ezy-Internet Guide** is the result of John's passion - here's a summary of what you will find inside:

- Preparing for action – where to get started
- All about security programs – backing up your files
- Essential computer programs – what you need and what you don't
- Storing your files – how to use your computer effectively
- Transferring files to your website – what you need to know about ftp, c-panel and a web page editor
- Selecting a name for your website – choose it carefully
- Finding a home for your site – you need a good landlord to rent from
- Web designs to attract and appeal – a template can do the trick if done correctly
- Adding your own content
- What to change on a template
- Where to find the best freebies
- Tips and tricks and much, much more

~~~~~

**END NOTE**

At some point, most people realize the first order of business had better be a website. And that's where the dream comes to a screeching halt. Even if they plan on doing no more than marketing as an affiliate for someone else, the fact is a website is necessary to "captcha" your visitors.

You owe it to yourself to acquire a website. You can pay someone to design it for you OR you can build it yourself and feel the wonderful results it can bring. And now you can build it easily!

Most of what John shares with you is absolutely free. If you've fallen out of favor with internet marketing just for lack of a website or the funds to have it done, you owe it to yourself to try this method and experience the wonderful results it can bring.
