Chapter 9: References.....	109
Chapter 10: Track Records and Statistics.....	110

## **Chapter 1: Introduction**

When you read the Tailwind Trading System e-book and the Penny Stock Castaways e-book, you will notice some similarities between the two e-books. Some paragraphs are identical, for example, the following paragraph is in both e-books:

"Stock trading involves risk. Only risk capital should be used for trading stocks. It is a good idea to begin by trading on paper when you are learning a new stock trading system. Everyone's financial situation, risk tolerance, and schedule are different. By trading on paper, you can decide which of the Tailwind Trading System (Penny Stock Castaway) buying and selling strategies will best suit your needs."

There are a few more identical paragraphs in the e-books, for example, in reference to stock market indexes. The paragraph above and other identical paragraphs have been left intact in both e-books because they apply equally to both strategies. We also left them intact so the reader does not have to jump back and forth between each e-book and it enables each e-book to be a standalone strategy. Each e-book can be read and learned independently from the other.

We have also used a similar layout for some of the chapters in both

e-books, for example, the chapter on finding the stocks and the chapter for testing. We kept the structure of these two chapters and other elements of the e-books similar because we feel that they are a very good way for the user to easily learn and use the strategies, and that is the most important matter. Our goal is to convey our strategies in such a way that the user can easily and effectively use them.

While there may be a few similarities in the writing, make sure that you read both e-books in detail because they are significantly different strategies.

## Chapter 2: Getting Started

The Tailwind Trading System is a unique trading system that has proven to be powerful and very profitable. It is easy to learn and can be used by beginners and experienced stock traders. You will not need any charting software or subscription services to use the Tailwind Trading System. All of the information that you need to use this stock trading system is included in this e-book.

Stock trading involves risk. Only risk capital should be used for trading stocks. It is a good idea to begin by trading on paper when you are learning a new stock trading system. Everyone's financial situation, risk tolerance, and schedule are different. By trading on paper, you can decide which of the Tailwind Trading System buying and selling strategies will best suit your needs.

The Tailwind Trading System should provide you with plenty of trading opportunities. The Tailwind Trading System has produced more than 600 stocks to trade over the past 9 years. You will see this when you look through the overall track records and the detailed track record in **Chapter 10: Track Records and Statistics**.

All of the stocks that could be traded with the Tailwind Trading System are listed in the detailed track record, along with the dates when these stocks would have been traded. You will see that from January 2000 through December 2008, the Tailwind Trading System found stocks to trade in almost every month.

You will also notice in the overall track record that the Tailwind Trading System has performed consistently well during these years. That includes both a bear market and a bull market.

When you look through the track records and statistics in **Chapter 10: Track Records and Statistics**, you will see what the Tailwind Trading System has done over the past 9 years. Of course, past performance does not guarantee future results; however, you can imagine what the Tailwind Trading System may do for you over the next 10 years!

The Tailwind Trading System will utilize stock market research that is both confidential and public, and will enable you to ride this Tailwind for some easy profits.

Some of the most well known stock market indexes in the United States include the Dow Jones Industrial Average, the S&P 500 Index,

the Nasdaq Composite Index, and the Russell 2000 Index. These indexes, made up of a basket of stocks, are often used to measure the performance of the stock market, and in some respects, the overall economy as well.

The Tailwind Trading System is a stock trading system that has proven itself in both good markets and bad markets and may be used for many years to come. Hopefully, you will have many years of profitable trading with the Tailwind Trading System!

We wish you the best of luck with your stock trading endeavors and we hope that you enjoy all of our stock trading e-books. Chapter 2 continues to present further aspects of the “Tailwind Trading System” in the full document.

**To your trading success!**

**For A Limited Time ONLY \$47.00  
(Reduced From \$138.00)**

## The Trading Pro Package eBooks

(Total Combined Value: \$138.00 When Purchased Separately)

### 1. Tailwind Trading System (Price on its own: \$47.00)

For beginners and seasoned traders- The Tailwind Trading System is a unique stock trading system with a proven track record that safely and easily turned a portfolio of \$5,000 into \$42,000 and turned a portfolio of \$100,000 into \$850,000 using a small number of trades and a minimal amount of time and effort.

150 pages includes:

- The Tailwind Strategy
- Finding The Tailwind Stocks
- Identifying The Tailwind Stocks
- Trading The Tailwind Stocks
- Tailwind Trading Guidelines

### 2. Pennystock Castaways (Price on its own: \$47.00)

This Powerful Penny Stock Trading Strategy takes advantage of penny stocks that have been cast aside by the Wall Street crowd. But you'll know something that they don't know! While Wall Street is looking the other way, you'll be swooping in on these penny stocks and making profits time after time, year after year.

138 pages includes:

- The Castaways Strategy
- The Theory Behind The Profits
- Finding The Castaways
- Identify The Castaways
- Trading The Castaways
- Annual Castaways

### 3. M & A Profits (Price on its own: \$27.00)

Every year, high priced money managers try to beat the market ... and most of them can't do it! With the M&A Profits stock trading strategy, you'll have the opportunity to beat the market, and those high priced money managers! With step-by-step instructions and detailed strategy guidelines, you'll learn which stocks to look for, which stocks to avoid, and how to make the trades. Even experienced traders will benefit from M&A Profits!

71 pages includes:

- Mergers and Acquisitions
- The M&A Profits Strategy
- Adding Up The Profits
- M&A Examples
- Finding The M&A's
- M&A Strategy Guidelines

### 4. IPO Secret (Price on its own: \$17.00)

The IPO Secret - "*Initial Public Offerings*" - exposes one of Wall Street's dirty little secrets. Wall Street insiders don't want you to know about this secret because they don't want you cutting into their profits! You'll learn what the IPO Secret is and how you can profit from it! You'll see the IPO Secret strategy "in action" with the stock charts that are included in the e-book. See the profits that this trading strategy can generate!

25 pages includes:

- What Is An IPO?
- The IPO Secret
- How To Profit From The IPO Secret
- IPO Examples
